

The King in yellow

The king in yellow has 6 tentacles, if you aren't sure about the position of the tentacles put the main body in the same position of the image and check the position of the tentacles

The possessed cultist

This model is very easy to assembly but the position of the arm can be tricky. Follow the 2 images to understand the position (the main clue is the the right which has his arm part attached to the main body).

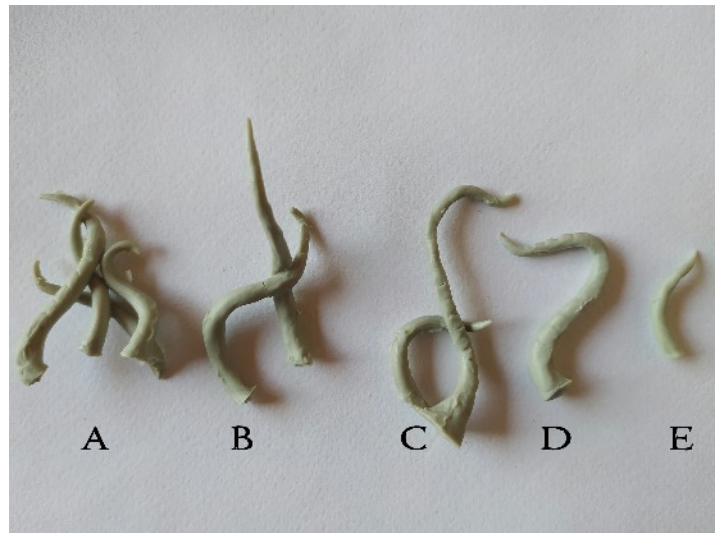

Use the other image (the one with the backview) to better place the arm.

The Dark yong

This is the only one model hard to assembly then follow the order of this images

the tentacle "a" it's the most difficult, use some hot water to adapt it if it dont fit to the 3 stumpson the body

Tentacle A

Tentacle B

Tentacle C

Tentacle D

Tentacle E
